The war of the dictionaries has resulted in something. The publishers of Webster's Dictionary, in order to determine the claims put forth by the publishers of Worcester, have had the words in the vocabulary of the two counted, and Webster has come out 7,686 ahead. If this is not a war of words, what is?

**It has been found necessary to reduce the number of young ladies employed in the U. S. Mint, at Philadelphia.** As each of the young ladies had forty influential friends, the task was a delicate one. So the directors, rather than lose the mints, determined to do up the matter by chance. Accordingly forty pieces of paper, twenty-three of which were marked "retained" and the rest blank, were placed in a box and drawn by the sweet employees, and the unfortunate took their band-boxes and left. There's a delivery for you.

He however, allows one of them six columns of this type to say a parting word.

One of the paragraphs reads thus: "If by laying down my life this last year, I could undo what has been done the last two years, (beginning with the disastrous report of the Missouri Compromise) to further the separatist of the country against each other, I would not hesitate to do so."

**MAKING SARRAM SCHOOL CORRECT.**—A good school of two thousand scholars. The school children will take place in the last vestige of liberty swept from the face of the American continent, the South, the loyal South, the Constitutional South, will never submit to the degradation of Abraham Lincoln.
